Journal of Applied Geophysics 38 (1997/1998) 323–324

JOURNAL OF APPLIED GEOPHYSICS

Contents Volume 38, 1997/1998

Research Papers

Potential focusing: a new multielectrode array concept, simulation study, and field tests in archaeological prospecting
C. Panissod, M. Lajarthe and A. Tabbagh 1

Estimating the yield of crushable stone in an alluvial fan deposit by electrical resistivity methods near Stuarts Draft, Virginia
A.A. Nowroozi, G.R. Whittecar and J.C. Daniel 25

Electromagnetic fields of loop antenna with axis parallel to planar interface
A.Q. Howard Jr. 41

The modelling of direct current electric potential in an arbitrarily anisotropic half-space containing a conductive 3-D body
P. Li and N.F. Uren 57

Use of the magnetotelluric method in the study of the deep Maestrichtian aquifer in Senegal
B. Giroux, M. Chouteau, M. Descloîtres and M. Ritz 77

Electromagnetic radiation method for rock and gas outburst forecast
V. Frid 97

Estimating groundwater flow velocity from changes in contact resistance during a saltwater tracer experiment
O.B. Lile, M. Morris and J.S. Rønning 105

1D joint inversion of AMT and resistivity data acquired over a graben
F.A. Monteiro Santos, A. Dupis, A.R. Andrade Afonso and L.A. Mendes Victor 115

Variable damping factors in travel time tomography
M. Bernabini and E. Cardarelli 131

Integrated remote sensing and geophysical techniques for locating canal seepage in Nebraska
P.J. Engelbert, R.H. Hotchkiss and W.E. Kelly 143

Detection of shallow objects using refracted and diffracted seismic waves
I. Belfer, I. Bruner, S. Keydar, A. Kravtsov and E. Landa 155

Digital analysis of aeromagnetic maps: Detection of a fault
P.S. Naidu and M.P. Mathew 169

Inversion of transient electromagnetic profile data using conductive finite plate model
M. Pirttijärvi, S.K. Verma and S.-E. Hjelt 181

Magnetometry of the marine, Ordovician Lockne impact structure, Jämtland, Sweden
E.F.F. Sturkell and J. Ormö 195

Ground radiometric survey of U, Th and K on the Lipari Island, Italy
P. Chiozzi, V. Pasquale and M. Verdoya 209

Currents induced by geomagnetic storms on buried pipelines as a cause of corrosion
A. Osella, A. Favetto and E. López 219

Book Review

Potential Theory in Gravity and Magnetic Applications, by R.J. Blakely 235

Research Papers

Resolution of 2D Wenner resistivity imaging as assessed by numerical modelling
T. Dahlin and M.H. Loke 237

Real time 2D inversion of induction logging data
L.A. Tabarovsky and M.B. Rabinovich 251

Rock magnetic properties and ore microscopy of the iron ore deposit of Las Truchas, Michoacan, Mexico
L.M. Alva-Valdivia and J. Urrutia-Fucugauchi 277

Seismic sources for shallow investigations: A field comparison from Northern Germany
R. Herbst, I. Kapp, H. Krummel and E. Lück 301

Book Reviews
Principles of Applied Geophysics, by D.S. Parasnis – D. Patella 319
Field Geophysics, by J. Milsom – A Correia 321
